

APPENDIX V

Comments to Corbin's second Wayfinding Plan

Comments to the Exterior Wayfinding Sign Package presented by Corbin on November 20, 2002

General Comments

- The preliminary design illustration identified the logo at the top of the post with a triangular design. We would like some notes on its assembly, as well as, dimensions. We are concerned about the structure and longevity of this design and request that the design be modified to reflect a single flat panel. We would also like to see drawings and dimensions that would accompany this design change that would reflect a single flat panel, in place of the proposed triangular structure. Please also clarify if the size of these, in both cases, will vary depending on the size of the panels with the sign copy (large 5' panels or small 4' panels).
- The current drawings show the signs mounted or attached using a plate and bolting system. We would prefer to have the pole buried at a depth of three or four feet and request that the final design illustrate this method of installation.
- We request a set of engineering drawings for the signs.
- We request dimensions for the parking sign, which will be at the corner of Paul Laurence Dunbar Street and Edison (see sign 1P in plan).

Specific Comments

Sign No.	Preliminary Comments to Wayfinding Plan as of January 16, 2003
1	No comment
1P	General Comments: Specific Text Comments: Directional arrows for parking should indicate <i>turn right</i> .
2	No comment
3	No comment
4	No comment
5	No comment
6	No comment
7	General Comments: Specific Text Comments: Add to sign copy U.S. Air Force Museum. Directional arrow should indicate <i>straight ahead</i> .
8	General Comments: Specific Text Comments: Replace National Aviation Hall of Fame with Dunbar House State Memorial. Directional arrow should indicate <i>turn left</i> .
